

# ARENA

## It's clearly **flexible.**

Featuring four passive two-way models and two passive subwoofers, the new ARENA series delivers professional performance at a remarkably affordable price. Among the many premium appointments are a high-quality, multifunctional housing made of robust multiplex, efficient components, rotating high-frequency horns, and professional-grade rigging points.

Delivering professional sound for every application, ARENA two-way enclosures are ideal for use in FOH systems, as ground monitors, and for fixed installation. Combinations of ARENA 10 and ARENA 12 speakers with SW 15 and SW 18 subwoofers are perfect for live and DJ applications. ARENA 15 was designed especially for smaller full-range applications.
