ARENA PRO

Passive **speakers**, active **investment**.

Professional users largely rely on passive speaker systems for sound reinforcement. Passive components allow them to reuse their power amp racks when they buy new cabinets, keeping investments manageable. The ARENA PRO Series aims to satisfy discriminating customers' demands for audio performance by providing speaker cabinets featuring premium RCF® components and top-drawer features, designed for professional applications and to yield fast return on investment. Arena PRO offers luxury-class performance at an unprecedented price-to-performance ratio.

ARENA SW18 PRO
18", 1000 W RMS

ARENA PRO 10-15 System
Compact yet surprisingly powerful, this system delivers richly detailed, expansive top end and impressive dynamics.

ARENA PRO 12-215 System
Compact yet very powerful, this is the perfect combination of 12" mid-/high-range units and fast, agile 15" low-frequency transducers with very true dynamic response.

ARENA PRO 15-218 System
This is a very powerful rig with excellent sub bass response and considerable dynamic headroom.
